## Technical Skills

**Programming Languages** | Python 3, JavaScript ES6+, C++, HTML5, CSS, SQL
**Front-End** | React, DOM manipulation, WebSockets, React Hooks, Redux Toolkit
**Back-End** | Django 4, PostgreSQL, MongoDB, FastApi, RabbitMQ
**System Design** | Monoliths, Microservices, Domain-driven design, Message passing, Event sourcing

## Application Development Experience

**Attack On Python** | Full Stack Engineer                                                            **2023**
- Developed a web browser game interface for seamless play as a Single Page Application (SPA), utilizing React.js and incorporating Bootstrap's styling library.
- Implemented FastAPI as the backend technology to ensure fast, scalable, and reliable performance.
- Incorporated front-end and back-end authorization using JSON Web Tokens to authenticate for tracking of users scores.
- Implemented an application deployment process utilizing CI/CD pipelines that successfully passes unit tests.

**Elite Motors** | Full Stack Engineer                                                                **2023**
- Developed a Docker-based RESTful API system capable of handling data for a rapidly growing dealership.
- Implemented real-time inventory tracking functionality using WebSocket technology, providing instant updates on stock availability and reducing manual data synchronization efforts..
- Designed and developed microservices for seamless integration between Inventory, Sales, and Service modules, enabling efficient data sharing and streamlining business processes.

**Closet Tracker** | Full Stack Engineer                                                              **2023**
- Implemented Django's ORM to manage and utilize data stored in a MySQL database.
- Designed microservices for easier integration between wardrobe for users hats and shoes.

## Professional Experience

**Delivery Driver** | Amazon Delivery S.F.M.                                                          **2022 - 2023**
- Loaded, organized, secured equipment onto company vehicles, while keeping track of inventory.
- Managed time effectively to make deliveries on time while maintaining safety protocols.

**Security Officer** | Peppermill Casino & Resort                                                     **2021 - 2022**
- Secured premises by patrolling property, monitoring surveillance equipment and access points.
- Performed safety measures to guests with certain medical conditions in critical situations.

## Education

**Hack Reactor**, *Advanced Software Engineering Certificate*                                         **2023**
